LED PLANT & CIVIL

Capability Statement

About Us

LED Plant and Civil deliver dependable civil works, earthworks, underground service installations and plant hire solutions for developers and principal contractors across Southeast Queensland.

From early works right through to handover, we combine the right people, machinery and methods to keep projects safe, compliant and on program.

What we do:

- Civil works & earthworks: bulk earthworks, site preparation, trimming, detailed excavation including GPS
- Underground services: trenching, conduits, pits, drainage, kerb and channel, reinstatement
- Plant hire: wet and dry hire of excavators, posi-tracks, moxis, and support equipment
- And much more

Our Experience

With extensive industry experience, LED Plant & Civil has supported major principal civil contractors on a diverse range of infrastructure projects.

In addition to the company's proven capability, LED benefits greatly from the leadership of our Director and Operations Manager Nick Murphy and Superintendent John Finnegan. Both possess considerable experience in team and project management and are well respected within the civil construction industry.

Nick has received published accolades for his unwavering commitment to getting the job done right the first time, ahead of schedule, and with complete safety and transparency.

John brings dependable operational leadership and a strong industry reputation for delivering complex works efficiently and safely.

Why Choose LED Plant & Civil

- Experienced pipelaying and excavation specialists
- Modern, Reliable and well-maintained plant and equipment
- Safety-first culture and continuous improvement focus
- Flexible service model that adapts to client needs
- Dedicated Operations Management team (Operations Manager and Superintendent) with 40+ years' combined civil and earthmoving experience, including 35+ years leading projects and teams
- Professional corporate leadership applying the Integrated Management System across the business and driving consistent improvement and operational excellence

Core Capabilities:

Pipelaying

LED delivers technically precise installation of stormwater, sewer, and water-main infrastructure, applying compliant trenching, pipe embedment, pit construction and alignment controls. Our pipelaying teams install PVC, PE and concrete pipe systems to industry specifications, supported by rigorous testing, quality assurance and disciplined excavation practices for reliable, long-term network performance.

Core Capabilities:

Detailed Excavation

LED delivers precise detailed excavation using advanced Topcon, Kommand and Trimble Earthworks GPS systems to achieve exact grades, trench profiles and structural excavation tolerances. Our operators integrate digital design models with disciplined earthmoving methodologies, ensuring compliant trenching, efficient material management and industry-standard accuracy for complex civil and underground infrastructure works.

Core Capabilities:

Custom Drainage Solutions

LED delivers custom drainage solutions including engineered slabs, box culvert installations, bespoke headwalls and large-scale stormwater pits. Our team constructs tailored reinforced concrete and pre-cast structures to specification, integrating accurate excavation, formwork, pit construction and hydraulic design requirements to ensure compliant, high-capacity drainage performance on complex civil sites.

Core Capabilities:

Plant Hire Wet & Dry

LED provides modern, fully maintained plant supported by experienced operators, delivering reliable wet and dry hire solutions that ensure efficient and high-performance outcomes on any civil project.

Current Equipment

- **Komatsu PC88MR-11** – 8-ton excavator
- **Volvo ECR145EL** – 14-ton reduced-radius excavator
- **Kobelco SK235SR-2 WB** – 23-ton short-radius excavator
- **Volvo EC250** – 25-ton excavator
- **Volvo 26t Excavator** – 26-ton excavator
- **JCB Loader** – Articulated loader
- **Moxi HM300** – 30-ton articulated dump truck
- **2 x Komatsu PC290** – 29-ton excavator
- **CAT 330 GC** – 30-ton excavator
- **Komatsu PC360** – 36-ton excavator
- **Kobelco SK380XD** – 38-ton excavator
- **Kobelco SK380XDLC-10** – 38-ton excavator
- **Bobcat T590** – Compact track loader

Safety

Quality

&

Environment

LED Plant & Civil maintains robust internal systems aligned with industry best practice. We are currently in the process of obtaining ISO 45001 (Safety), ISO 9001 (Quality), and ISO 14001 (Environmental Management) certifications.

Citation Certification

10th March 2026 Client No. 500-25403

Re: Management System Certification

THIS IS TO CERTIFY THAT:

Led Plant and Civil Pty Ltd

of

11 Carisbrooke Court Birkdale Qld 4159

Have made the commitment to the further development and implementation of their management system to meet the requirements of the following standards:

ISO9001 - Quality Management
ISO14001 - Environmental Management
ISO45001 - Health and Safety Management

We confirm that the company has contracted Citation Certification (CC) to provide assessment and certification services.

Based on advice received from the company, it is expected that the initial certification assessment by CC will take place within 12 weeks.

Kind regards,

Barry Fairman

4 Pillars Of Success

Quality Workmanship & Technical Excellence

LED delivers quality workmanship through skilled professionals, state of the art equipment, precise civil construction methods, and a commitment to technical excellence that ensures consistent and reliable outcomes, done right the first time.

Safety Without Compromise

LED delivers safety without compromise by investing in equipment that makes work safer and strengthening our systems through our commitment to achieving ISO 45001 certification.

Accountability and Trust - Through Complete Transparency

LED builds accountability and trust through complete transparency, ensuring open, consistent communication with principal contractors and stakeholders for clear expectations and reliable project outcomes.

Continuous Improvement & Growth

LED's continuous improvement culture is driven by sustained investment in people, processes, and systems, reinforced by our pursuit of tri-certification to raise organisational standards.
